

## Introducing ASTRA: Always Secure, Timely, Reliable Access

ASTRA is our new virtual desktop experience designed to make accessing your clinical tools faster, more consistent, and more secure—no matter where you're working.

### What is ASTRA?

ASTRA gives you a full hospital desktop that follows you. Instead of being tied to a single workstation, your desktop, applications, and settings are available wherever you log in – on any approved device.

---

## Why ASTRA Matters to You

### Always Secure

- Your data stays protected within the health system – nothing is stored on local devices
- Automatic updates and security protections happen behind the scenes
- Helps keep patient information safe and compliant with healthcare regulations

### Timely Access

- Consistent login and access to your applications
- Your desktop is ready when you are; no need to wait for slow workstation startups
- Resume your session quickly, even after disconnecting

### Reliable Experience

- Consistent performance across locations, units, and devices
- Fewer disruptions from workstation issues or software differences
- If one device has a problem, simply log in somewhere else and continue working

---

## Designed for Clinical Workflows

ASTRA is built with your day-to-day work in mind:

- **Move freely between workstations** without losing your place
- **Access the same tools and layout every time** you log in
- **Spend less time troubleshooting** and more time focused on patient care

### What You'll Notice

- A familiar desktop experience that looks and feels the same everywhere
- Your applications and settings follow you automatically
- Improved stability during your shift

### What You Don't Have to Worry About

- Installing updates or fixing workstation issues
- Losing work when switching locations
- Differences between computers slowing you down

---

## The Bottom Line

ASTRA is designed to support you – so technology gets out of the way and lets you focus on what matters most: **providing the exceptional patient care** our patients and guests have come to know.
